

RING SIZE GUIDE

- Ring measurements are very precise. Follow the instructions to get an accurate measurement.
 - Before printing, ensure that the page scaling is set to “None” in your print dialog box.
 - Measure the bar on top of the page. It must be exactly “2 inches” or “50 mm” long.

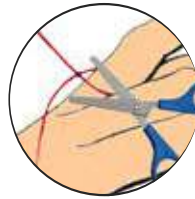

METHOD 1 - MEASURE CURRENT RING

- Select the ring that fits perfectly.
- Place the ring over the circle below. Match the inside edge of the ring to the sizing circle.
- The inside diameter of the ring should precisely match the diameter of the sizing circle.
- If the ring is in between two sizing circles, choose the larger size

METHOD 2

- Get a reel of thread/ paper strip.
- Wrap the thread / paper strip around your finger.
- Please make sure that the thread / paper strip is wrapped around the finger snugly.
- Do not overlap the thread / paper strip nor should it be tight.
- Cut the thread/ paper strip to the exact size of the finger circumference.
- Now measure the length of the thread / paper strip on a measuring scale at home.
- Use the measured dimension for getting the ring size with the help of the chart provided
- Take measurements at end of the day when the fingers are of largest diameters.
